Profile

I am a software developer with a degree in Computer Engineering from the Polytechnic Institute of Bragança. I have four months of experience at Glintt, a technology and healthcare company, where I worked with the Angular + TypeScript framework for front-end design and .NET Core with Oracle Relational Database for the backend. Prior to that, I participated in various academic and research projects in the field of AI, applying my knowledge of algorithms, machine learning, and neural networks. My key strengths are the ability to solve complex problems, creativity, collaboration, and communication. My goal is to continue developing my skills. I am passionate about learning new tools and methodologies, and about exploring new challenges and opportunities.

Education

Bachelor's Degree in Computer Engineering

Present

Polytechnic Institute of Bragança

- Project: Creation of an automation mechanism for quality control in food production processes, using the Farm to Fork strategy with IoT technologies.
- Project: Development of a game using OpenGL and modeling of a 3D environment in Blender.
- Project: Development of a system for data management and manipulation, programmed in C#, with visualization through a graphical interface application using UWP (Universal Windows Platform).

Employment

Consultant

May 2024 - Dec 2024

AMT Consulting, Porto

- Collaboration in research and development (R&D), contributing to technological innovations and efficient solutions for clients.
- Development and optimization of solutions using the SAP BTP (Business Technology Platform) and SAP S/4HANA to improve the performance and scalability of business processes.
- Programming in ABAP, creating customized and integrated solutions within the SAP system.

Software Development

Mar 2022 - Jun 2022

Glintt, Porto

- Preparation of a technical article, covering the frameworks and tools used in the development of the internship project.
- Maintenance and update of a web application, using the Angular + TypeScript framework for front-end design and .NET Core with a Database for the back-end.

Front-end Developer

May 2025 - Nov 2025

Oddsgate, Porto

I worked on the development and maintenance of a server responsible for integrating and delivering games from various B2B providers, including Booming Games, Reevo, and other iGaming aggregators. I also developed a complete crash-style game from the ground up from initial concept to final implementation
